## Features

Symbols pay anywhere on the screen. The total number of the same symbols on the screen at the end of a spin determines the value of the win.

Refilling. It can give you many consecutive wins on every spin. Refilling means that after every spin all combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty cells are filled with symbols coming from above. Refilling will continue until no more winning combinations appear as the result of a Refill. There's no limit to the number of possible Refills. All wins are added to the player's balance after all of the Refills resulting from a base spin are played.

Scatter symbol. Can appear on any reels. 4 or more Scatter symbols trigger Free Spins.

Free Spins. Initially the round consists of 15 spins. If during the round 3 or more Scatter symbols drop in one spin, the feature is retriggered.

Multiplier symbol. It has a randomly selected multiplier from x2 to x500. A Multiplier symbol can drop both in the main game and in the Free Spins round. In the main game, if more than one Multiplier symbol drop in one spin and there is a win as a result of the spin, their multipliers are summarized, and the sum is applied to the total win at the end of the spin. In the Free Spins round multipliers are accumulated. If there is a winning combination as a result of the spin, and Multiplier symbols drop in this spin, their amounts are summarized and accumulated. The multipliers of each of the following winning spins are added to this sum of the multipliers. The sum that is applied to the win of a spin is the sum of the earlier accumulated multipliers plus the multiplier(-s) of this particular spin.

Buy Bonus. A player has the possibility to buy the round of Free Spins in the main game. The purchase price is x100 of the bet. The next spin after the purchase triggers Free Spins. The feature is disabled if the Chance x2 feature is active.

Chance x2. A player can buy a double chance to hit Scatter symbol. The feature increases the bet by 25%. The feature is disabled if the Buy Bonus feature is active.
