Spin Results

If a winning combination is formed along any payline, it will become animated and the win amount is displayed in the Total Win field.

 All symbols pay left to right on consecutive reels of an active payline.
 Coinciding wins on several active paylines are added.
 Payouts are made according to the paytable.
 Payline wins are calculated by multiplying the payout value (from the paytable) by the bet per line value.

The bet per line is calculated by dividing the total bet by the number of active paylines (e.g., a 100-credit total bet with 5 active paylines equals a 20-credit bet per line).
Note that only the highest win is paid on each of the active paylines.
